

Natural wave pompadour with a low bald fade.

Savills' Joth Davies shares the techniques he uses to achieve one of his signature cuts...

STEP 1

STEP 2

Use the **Wahl Beret** trimmer to create a mapping line for the bald fade, keeping the line low due to head shape and low hair density. Make sure you allow weight in the corners to maintain correct shape.

Use the **Wahl Finale** up to 2-3mm below the original mapping line, using gentle strokes and working from multiple directions for a super close finish.

STEP 3

Use the **Wahl Magic Clip Cordless** with desired Wahl Premium Guide Comb (in this case a #2) to follow parallel approximately 2 to 3 inches above the original mapping line, blending as you go. Use an arc or C shaped motion with your clipper depending on hair density.

STEP 4

Use the **Magic Clip Cordless** with the next lowest Wahl Premium Guide Comb (#1.5) with the taper lever open 1 to 1.5 cm parallel just below your last blended #2.

STEP 5

Repeat step 4 using #1.5 guide comb with the taper lever **closed** 0.5 to 1 cm lower. Repeat previous step using #1 guide comb with taper lever **open** 0.5 to 1 cm lower. Repeat previous step using #1 guide comb with taper lever **closed** 0.5 to 1cm lower. Repeat previous step using **no guards** with taper lever open 0.25 to 0.5 cm lower. Repeat previous step using **no guards** with taper lever **closed** 0.25 to 0.5cm into original base line that was created with the **Beret** trimmer.

STEP 6

Finish edging and line out around the temple with the **Beret**.

STEP 7

Cut top to desired length with square layers and then style.
